DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

The species are as follows:

Species I –First embodiment of the transport device (figure 1).

Species II – alternative embodiment of the transport device (figure 2 and 2A).

Species III – side, bottom and front view with another variant. (Figures 3-6).

Species IV- transport supporting device (figures 7 and 8).

Species V-other variants of first embodiment (figures 9 and 10).

Species VI-second embodiment of a transport device (figure 11).

Species VII-attaching device (figure 12).

Species VIII-second embodiment of attaching device (figure 13).

Species IX-attaching device connected to transport device (figure 14-16)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, None are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as 37 CFR 1.141. If claims are provided by added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia F. Collado whose telephone number is (571)2728315. The examiner can normally be reached on mon-fri 8-4.
